

MTP_Argus Upgrade_ [AS8.4]_ Weekly Discussion Meeting for Configuration and Customization-20230602_103120-Meeting Recording

June 2, 2023, 5:01AM

55m 46s

 **Geda, Yash** joined the meeting

 **tamechika ichirou/為近 一郎** joined the meeting

 **tamechika ichirou/為近 一郎** joined the meeting

 **Batheja, Rahul** joined the meeting

 **Sampathila, Manohara** 1:52
Do we have everyone in the call from MTP?

 **kawasaki yuujiro/川崎 雄二郎** 2:09
Yes, I think maybe in both said there.
If it is that.

 **Sampathila, Manohara** 2:16
OK, so Bono will be joining soon. So can we get started with the STS X?

 **Pant, Bhavana** joined the meeting

 **Sampathila, Manohara** 2:24
You know the open points Rahul and Michael.

 **clements michael/クレメンツ マイケル** 2:28
OK. But that's in the interface STS ** so it doesn't really need everyone on the call.

 **Sampathila, Manohara** 2:31

Yeah, Andrew.

Ohh OK, because as we are waiting for banana, so if we can get started with that.

 **clements michael/クレメンツ マイケル** 2:35
It's not.

 **Pant, Bhavana** 2:43
Everyone, sorry for being late.

 **Sampathila, Manohara** 2:44
OK.
OK.
Ohh.
So maybe we can take that interface at the end. Michael, we can, yeah.

 **clements michael/クレメンツ マイケル** 2:55
Yeah. Otherwise we can have a short meeting with a few people did.

 **Sampathila, Manohara** 2:57
Yeah.

 **Pant, Bhavana** 2:57
OK.
Ohh actually hopefully this should be a short meeting. I we've already signed off our version 4 of the Custom FRS. I quickly just wanted to check in on the OQ scenario document and then the CPLD. So which one would we like to start with first?

 **clements michael/クレメンツ マイケル** 3:22
Ohh sorry, I'm gonna go wreck you something before.
But don't think for Iraqi sounds not on this call, but I know she's been looking at them. If anyone else wants to talk about focus scenarios, cause I guess some movies.

 **kawasaki yujiro/川崎 雄二郎** 3:42
You know, we we don't call auction for this meeting, so.
We're going to proceed to project screen. Ohh you see it?

Pant, Bhavana 3:48

OK.

From a business perspective, Kawasaki SAN is the okay scenario document OK.

kawasaki yuujiro/川崎 雄二郎 3:54

Hmm yeah.

Pant, Bhavana 3:56

OKOK.

Um and Michael, I saw your mail regarding the.

The reporting rules, as well as the Northern Ireland license configuration.

cléments michael/クレメンツ マイケル 4:08

Yeah, we're getting the.

Pant, Bhavana 4:09

I'm understanding that the system is correct, we just need to document it correctly in the CBD, correct?

cléments michael/クレメンツ マイケル 4:14

Exactly.

Pant, Bhavana 4:16

OK.

So we'll take care of that and hopefully post this. Can we presume that we can start the approval of CBD or is there something that you would like to discuss in that?

cléments michael/クレメンツ マイケル 4:31

We're still going through the comments and the feedback of the updates.

Pant, Bhavana 4:35

Okay.

So besides this, the only other thing that's going to be coming from our end today is going to be the PQ scenario document as well. So now that the UFR is versions and

everything are final, we will be cleaning that up as well and sending it to everyone. Any other comments or anything else that we d like to talk about? Streets. It's actually a short meeting from my side.

 **clements michael/クレメンツ マイケル** 5:01

Impact assessment document is a new version of that coming.

 **Pant, Bhavana** 5:06

Yes.

 **clements michael/クレメンツ マイケル** 5:09

Next week.

 **Pant, Bhavana** 5:10

Next week.

 **Sampathila, Manohara** 5:16

It will be early next week, Michael, but I don't see any major updates required for impact assessment. Is it right understanding? Ohh founder and Rahul.

 **clements michael/クレメンツ マイケル** 5:24

Ohh.

 **Pant, Bhavana** 5:29

Yes. Ohh my clean pack. From a business perspective I don't see any changes.

There are. There are just. There's just one this, this one trigger that we've disabled for the J21B population, which is working seamlessly now out of the box and therefore we wouldn't marked that as an out of the box requirement in the east to be document from a custom ufrs perspective. The new pre saves that we've added. After modifying the field validations, that would also go into the field, the impact assessment document.

And of course, the the new things that we had for Taiwan Ft, so those are the 3 things that I'm anticipating should be updated in the impact assessment, but. Really nothing else.

 **clements michael/クレメンツ マイケル** 6:18

I think the interfaces section might need some update, given that we've discovered that like the.

The default sort order in Oracle 19 C seems to behave differently to 12 C when these type of things.

Farrell knows the details of the issues. We sort of walked through on those interfaces, so probably need some update in there.

 **Sampathila, Manohara** 6:48

Rahul, if you are speaking, you're on mute.

 **Batheja, Rahul** 6:50

Yeah.

You are Michael there certain, like a couple of issues that we have an independent that have to be included in practice assessment.

Like the one.

Where?

They're better working in 812, but somehow due to some bug in 8 or 4 system and they they are not performing the same thing. So those will be included in impact assessment. Like if we consider J9, J, 10 for example for a genetic profile so that has to be included. We have noted that down while preparing SSX.

 **clements michael/クレメンツ マイケル** 7:30

Yeah.

But.

 **Batheja, Rahul** 7:37

So we'll have that included.

 **Sampathila, Manohara** 7:49

So ohh bounded. Do we need any confirmation? Clarification on comments of scenarios.

 **Pant, Bhavana** 7:57

No, I actually just had one comment from neither San in the office scenario document which was that you know we should have a downgrade and a nullification scenarios and Nathan have added that in the PMD mfd's OQ. I've added that scenario so that the.

You know the requirements that you're mentioning will be mapped over there. And Kawasaki San had also requested that when we're testing E2, BR 2 license partner import, we test do one test with a duct study because there's something that we also want to verify on the J side of things. And Kawasaki SANA have updated that as well. So there's no comment that I've not accepted. All comments have been accepted.

 **kawasaki yujiro/川崎 雄二郎** 8:39

Nice. I think I have added the 2 comment in this moment and you could you.

 **Pant, Bhavana** 8:47

Also new comments.

 **kawasaki yujiro/川崎 雄二郎** 8:49

Yes.

For that.

 **Pant, Bhavana** 8:51

OK.

 **kawasaki yujiro/川崎 雄二郎** 8:51

Ohh I think I did scenario.

Was I using the customer vision before this?

 **Pant, Bhavana** 9:02

Let me have a look come.

Ohh, let me bring up my screen and cover service and maybe you can just tell me which comment we're referring to.

Are you?

Is my screen visible for everyone?

 **kawasaki yujiro/川崎 雄二郎** 9:38

Ohh yes I can see your screen and.
If something like scenarios.
I don't have any description in come H just occasionally.

Pant, Bhavana 10:02

Yeah.
Well.

kawasaki yuujiro/川崎 雄二郎 10:09

Ohh yes.

Pant, Bhavana 10:18

Ohh so being the only place we were actually not mentioned. The test cases are oq 6 onwards and that is because these oq who's are actually having multiple cases inside them, they don't have just one single case. For example to test out the.

kawasaki yuujiro/川崎 雄二郎 10:24

Hmm.
Ohh.

Pant, Bhavana 10:38

The 4 saves because there are multiple post saves in the system and then we're also testing advanced auto labelling. There are going to be 10 or 20 cases inside this thing, so it's not possible for us to mention each kind of case and in in the example of post saves, it doesn't matter what kind of case it is, what we want to verify is that when the case is routed from X workflow to why workflow whatever post say was mentioned in the UFR.

kawasaki yuujiro/川崎 雄二郎 10:47

Ohh.

Pant, Bhavana 11:09

That is getting tested or not both positively and negatively. So for that reason only doesn't make sense to specify the test case over here.

kawasaki yuujiro/川崎 雄二郎 11:19

I understood, but can you add some discussion so?

Like like a multiple cases.

And my brother doesn't think. I'm not sure how to search.

Pant, Bhavana 11:33

That was like 10. Would it help if I can provide you the oki only the OK for this thing has been already authored. And Ryan, which is doing one final peer review.

If that is done, would it help if I provide you the entire okay only the data sheet has all the details.

kawasaki yuujiro/川崎 雄二郎 11:51

Yeah, I just hope she had covered this.

This OQ scenario, the material should be voted upon one.

So I think.

Pant, Bhavana 12:03

Yes, but I checked internally it's not mandatory for us to specify the test case scenario.

For things like this.

kawasaki yuujiro/川崎 雄二郎 12:10

Yeah. So, yeah, I'm I'm so please add some discussion that this this will use multiplication or something like that.

Pant, Bhavana 12:22

So you're saying like a high level overview?

kawasaki yuujiro/川崎 雄二郎 12:24

Ohh yes, like that.

cléments michael/クレメンツ マイケル 12:26

Just a statement to the fact that there are multiple cases.

Pant, Bhavana 12:26

Okay got it.

Sure. Got it.

kawasaki yuujiro/川崎 雄二郎 12:48

Thanks 36 and 37 7 on it.

Pant, Bhavana 12:52

Got it. So for 36 and 37 both, I'll add a very high level overview over here.

kawasaki yuujiro/川崎 雄二郎 13:02

Yeah.

Pant, Bhavana 13:02

OK. Anything else that was like, yeah.

kawasaki yuujiro/川崎 雄二郎 13:03

Yes, that's fine.

Nothing for me. Thank you.

Pant, Bhavana 13:07

Thank you.

Sampathila, Manohara 13:09

Any comments from Arakan on this open?

Pant, Bhavana 13:13

Ohh Minoru San, I think they said that Iraq, Iran is not there on the call.

Sampathila, Manohara 13:16

OK.

cléments michael/クレメンツ マイケル 13:16

Must be.

Is there not one comment from her father I saw earlier?

Pant, Bhavana 13:25

Ohh.

Not any new comment, Michael.

cléments michael/クレメンツ マイケル 13:28

Ohh okay yeah, that's just one you've heard. You responded to that one.

Pant, Bhavana 13:30

Ohh.

I'm only meeting.

Ohh.

cléments michael/クレメンツ マイケル 13:36

OK. Anyway, she's. She's still looking at the documents that she's got her open at the moment.

Pant, Bhavana 13:42

I didn't want.

cléments michael/クレメンツ マイケル 13:42

So.

I'm sure she'll lose out the comments, so if if if they're good.

Pant, Bhavana 13:45

Sure.

Yeah.

OK, so I'll address this one.

Sampathila, Manohara 13:49

So if visa.

Sorry.

If these are addressed, we are good to close this document.

Pant, Bhavana 13:53

Sudden.

cléments michael/クレメンツ マイケル 13:56

You're almost there.

Sampathila, Manohara 13:58

Yeah.

cléments michael/クレメンツ マイケル 13:59

That's about the end of the day. We should be good on this.

Sampathila, Manohara 14:03

Okay great.

So the next is scenario I think do we need any clarification bound on the PQ scenario? Sorry.

Pant, Bhavana 14:13

Hmm.

No, not at all.

Sampathila, Manohara 14:16

We are go down that OK.

So Rahul, can we talk about that Taiwan issue, what we discussed along with Varna yesterday?

Batheja, Rahul 14:42

Yes, my understand. Ohh I'll share my screen for that.

Like premium and you can see the screen.

cléments michael/クレメンツ マイケル 15:12

Yes.

Sampathila, Manohara 15:14

Yeah. Cancel.

Batheja, Rahul 15:18

Okay this is an older version of document, so that's why it's pending return over here.

Uh, it's regarding this point where we were discussing, like how the how the reports will mark the submitted in August. So basically as per our discussion with Brennan, we we sought to have 2 options for this while for marking report and submitted so. Ohh as it was being done earlier that there was a job that was running twice a day like this job and it was basically converting the moving the files into zip file and then sending it to Taiwan authority. So as soon as the files are moved to zip file via custom procedure in August so then only the reports are marked as submitted via backend process. OK so.

cléments michael/クレメンツ マイケル 16:07

2.

Batheja, Rahul 16:13

And now that that actually utility that that's not a custom one. So now that is taking care of zipping the files so.

Does the Penguin happen as soon as it's available in the location and it'll be it'll be moved to move it? It'll be sent to Taiwan where mail. OK, so now that the previous functionality is no longer working, so we won't be having the existing process of of submitting the files. So I'm back in process now either we can use an use the Oracle feature that is.

As soon as the the files are generated in the out folder, so it'll be updating the date submitted. Either that is one of the option or like or the other option is that that when the files were sent to files are sent to Taiwan and we'll get the mail from Taiwan SOOK and.

That'll be decompressed by X ray, and those acts will be used for populating the submission date in August. So these are basically the 2 options that we discussed with Vernon. So so, Michael, are we clear on this? Then we'll talk about the pros and cons of these things.

 **clements michael/クレメンツ マイケル** 17:34

Yeah, I thought that we've already.

Decided on this nut.

The the ACT process will the the Act will be received from the.

And then that will.

Do the submission date.

 **Batheja, Rahul** 17:46

So OK, so, so the act that will be sent by LS O right over mail.

 **clements michael/クレメンツ マイケル** 17:52

Yes, yes, yes.

 **Batheja, Rahul** 17:53

Thanks. So so Michael, there is a thing over there that if we are getting the end waiting for egg, so it it may not be an immediate process.

Okay it may take a couple of days for that and that will be reflected late in the system. Even though the case is submitted at Taiwan's and but.

Then they'll be sending the mail. We don't know that exactly whether it will be 2 or 3 days when will be getting that act back and then only it will mark the system. So it'll already be a late date when the report was actually submitted in this in the FD is.

So that is the biggest phones in that because because of the late data available in the system.

So are we good with this having a late date updated in the system? If so then then it's OK.

 **clements michael/クレメンツ マイケル** 19:01

No.

 **Batheja, Rahul** 19:05

And the other option that we were talking about is that updating the date submitted as soon as the files are generated. OK, the.

It's gone over. There is the negative thing that that is that when if even like, well, the reports will be marked as submitted as soon as the files are generated OK our file like

files are sent so point is that if we are getting a negative act the user has to do that upgrade manually because the file has already been submitted. So in case of negative back a manual process has to be taken care.

 **clements michael/クレメンツ マイケル** 19:37

Yes.

Yeah.

Batheja, Rahul 19:44

To handle these things.

clements michael/クレメンツ マイケル 19:46

Yeah, we want to avoid that.

Batheja, Rahul 19:48

We are right.

So.

clements michael/クレメンツ マイケル 19:50

OK, I understand the options. Let me think about that.

Batheja, Rahul 19:53

Young.

Show my God. So my girl can you? Can we have a decision now or we'll discuss it internally and then get back to us.

clements michael/クレメンツ マイケル 19:56

Because like.

Yes, I'm discuss it and get back to you.

Batheja, Rahul 20:05

So thank you.

Sampathila, Manohara 20:17

Okay, Michael. So we just wanted to have a clarity on this, so that there will not be

any.

Open items when we move forward to validation.

 **clements michael/クレメンツ マイケル** 20:29

Yeah. Good.

 **Sampathila, Manohara** 20:32

OK.

 **Pant, Bhavana** 20:34

Michael also have a very small update.

Hmm, it doesn't impact anything, but just so that you know, we can close the loop on it. Remember the bug that we had on event groups?

 **clements michael/クレメンツ マイケル** 20:45

Yes.

 **Pant, Bhavana** 20:47

So, um, we went back into the system and we did a small POC.

The issue is there if by any chance you have an advanced condition in the system where you're referencing the event group ID. So if you have an advanced condition where you're saying you know LM even group equal to.

100,000, blah blah, blah blah blah.

 **clements michael/クレメンツ マイケル** 21:08

Yeah.

 **Pant, Bhavana** 21:09

That's when that bug is occurring. However, thankfully in the MD environment, because I did a small PC, I created a test reporting room and everything was working correctly in it.

 **clements michael/クレメンツ マイケル** 21:13

Ohh.

Yeah.

Pant, Bhavana 21:23

The catch is if you create the advanced condition with the event group name.
Not the ID.
Then there is no issue.

cléments michael/クレメンツ マイケル 21:34

OK, right.

Pant, Bhavana 21:36

So Raul's already done one sanity check in the system, and he's confirmed that there are no C that are pulling the event group ID. If you'd like to just cross verify something from your end.
Please feel free to do so, but for our understanding then we will say that for the MTP system, there's no impact for this bug.

cléments michael/クレメンツ マイケル 21:58

OK, sure. Will double check on it. Thank you for the explanation.

Pant, Bhavana 22:02

Thank you.

Sampathila, Manohara 22:09

Wanna do? We need any discussion on CBD?
Open items.

Pant, Bhavana 22:16

I would say yes if we if we are at a stage where we've gone through the entire CD and there are any review comments that we can close and discuss. But I have a feeling that maybe MTP is just reviewing everything right now. Is my understanding correct?

cléments michael/クレメンツ マイケル 22:29

Yeah.

I'm definitely still reviewing things I don't know if anyone else has any specific points

on the CBD they want to discuss.
It's not as fun or comparison.

 **kawasaki yuujiro/川崎 雄二郎** 22:42
I don't have any special guidance.

 **内藤寛之 / NAITO, HIROYUKI** 22:45
No.

 **clements michael/クレメンツ マイケル** 22:47
OK, so we'll keep reviewing why you know.

 **Pant, Bhavana** 22:49
You can.
Perhaps when orders on what we can do is if we if we get a collated list of all the review comments by Monday.

 **clements michael/クレメンツ マイケル** 22:57
The.

 **Pant, Bhavana** 22:57
There's something that we can't address. Maybe we can just utilise half an hour of our Monday meeting, the last half an hour.

 **clements michael/クレメンツ マイケル** 23:06
Yeah, sure.

 **Sampathila, Manohara** 23:07
Sure.
OK. Any other points of discussion related to you know the any of the topics on Argus?

 **内藤寛之 / NAITO, HIROYUKI** 23:26
Not one of them. Sorry, Pikachu, *** ***.
You must.

Sampathila, Manohara 23:32

Yeah, that is yes.

I thought some speak you tomorrow will be sent today, yes.

内藤寛之 / **NAITO, HIROYUKI** 23:35

Thank you. Thank you.

Thank you.

Sampathila, Manohara 23:37

I think it's only we have to address your comment and send it across.

And cross verify the with the latest year for us.

内藤寛之 / **NAITO, HIROYUKI** 23:46

Thank you.

cléments michael/クレメンツ マイケル 23:51

I don't know if anyone saw it. I sent an email earlier. The interchange service doesn't seem to be.

Transmitting files.

If someone could have a quick look at that.

Be helpful trying trying to test this to one stuff.

Sampathila, Manohara 24:02

Yeah, yeah.

cléments michael/クレメンツ マイケル 24:06

Preferably before.

Sampathila, Manohara 24:06

Yes. Can you have a look into it?

I'll ask cash to look into it.

cléments michael/クレメンツ マイケル 24:16

Okay, if we can get it fixed before 4:00 PM, it would be because that's when the tie want stuff needs to transmit.

Sampathila, Manohara 24:20

Yeah.

cléments michael/クレメンツ マイケル 24:23

Thank you.

Batheja, Rahul 24:23

Show my lovely check this out.

Sampathila, Manohara 24:32

Ohh Kazakhstan has sent a bit mail earlier.

cléments michael/クレメンツ マイケル 24:38

Only one.

Sampathila, Manohara 24:40

Psnt all, each of the document as a list, so I'm just checking that.

I'm sharing that document.

Can you see my screen?

cléments michael/クレメンツ マイケル 24:58

Is.

Sampathila, Manohara 25:05

Yeah. Impact assessment we have touched upon, we will share early next week.

LOL, CBD. Once we review by end of day today.

Another we can discuss on Monday meeting.

OK, you scenario we have discussed picky scenario. We will send it across.

Speak your script. Yes, this has to be changed. I will update it.

So on the work you script as soon as.

You know, as mentioned by Bona, we have completed another few of them with the dry run and final verification is ongoing.

So as soon as you know the done reviews, we will start sending one by one. Ohh so that.

You don't have to wait for all the Wookie scripts to be completed.

 **kawasaki yujiro/川崎 雄二郎** 25:58
Exactly.

 **Sampathila, Manohara** 26:01
Take your script will I know the come later?
Argos, you are still reviewing it, if I'm right.

 **clements michael/クレメンツ マイケル** 26:11
August 86. We're waiting for IKEA to add the the move it appendix.

 **Sampathila, Manohara** 26:21
Let me check on that it.
We shall is there, let me speak to him and confirm that.
Interface ssx.

 **clements michael/クレメンツ マイケル** 26:30
And.

 **Sampathila, Manohara** 26:31
Sorry, we'll discuss after this.

 **clements michael/クレメンツ マイケル** 26:34
Yeah.

 **Sampathila, Manohara** 26:35
Ohh.

 **clements michael/クレメンツ マイケル** 26:39
Test blood.

 **Sampathila, Manohara** 26:39

OK. Yeah.

Tvq separate. I'll not.

Discuss here.

 **clements michael/クレメンツ マイケル** 26:46

You PVQ.

And I just like some just one comment remaining.

 **Sampathila, Manohara** 26:48

A DSX.

Let me speak to Connor on this afternoon, the impact a suspended, it's only on the TL incremental EI there and the conclusion is pending.

 **clements michael/クレメンツ マイケル** 27:03

And the the.

And a few other things in the email.

From the the comments from the URS that.

Like commented in their replies that they were gonna be include the stuff in the impact assessment. They haven't. They haven't done it.

 **Sampathila, Manohara** 27:17

Yeah, yeah, yeah.

And we will showcase that along with the demo. That's what we discussed yesterday.

 **clements michael/クレメンツ マイケル** 27:24

Okay.

Can we see on Monday?

 **Sampathila, Manohara** 27:27

Maybe.

Yeah.

Bq CBD, I believe you are reviewing it now.

 **clements michael/クレメンツ マイケル** 27:35

We have, but there's a lot of things that we've requested that haven't been.

Provided yet.

Sometimes, like comments from the IKEA team saying to be revisited completely this sheet.

Sampathila, Manohara 27:49

I think there are 6 or 7 sheets which, yeah.

cléments michael/クレメンツ マイケル 27:50

My something here, Mr Trump said. A list of them.

Where with reviewed and I think.

But I shan't sent an email saying we've completed our review, but there's those 6 or 7 sheets.

Still missing.

Sampathila, Manohara 28:08

Yeah.

cléments michael/クレメンツ マイケル 28:08

Ohh no.

Sampathila, Manohara 28:09

The blue coloured sheets, if I'm right.

cléments michael/クレメンツ マイケル 28:12

Something like that, yeah.

Sampathila, Manohara 28:13

Yeah, there are 70 plus sheets in the CBD.

cléments michael/クレメンツ マイケル 28:17

We have lots of coloured tabs in many documents.

Sampathila, Manohara 28:22

I I will check that the PVQ test plan. OK so we can start looking into it, yeah.

 **clements michael/クレメンツ マイケル** 28:28
Looking at.

 **Sampathila, Manohara** 28:31
Sure, this is understood.

 **clements michael/クレメンツ マイケル** 28:34
Pick your sweet like you said. No, we talked about yesterday.

 **Sampathila, Manohara** 28:36
Yeah.
Yes.

 **clements michael/クレメンツ マイケル** 28:39
Schedule.
Yeah.

 **Sampathila, Manohara** 28:42
OK, so that's another some of the key points.
So if no other points, you know that we can switch over to interface SSX.
And we can ask, you know?
The people who are.

 **clements michael/クレメンツ マイケル** 28:56
Not interested.

 **Sampathila, Manohara** 28:57
Not interested can drop.

 **clements michael/クレメンツ マイケル** 29:03
Thank you.
Because.

Sampathila, Manohara 29:06

Anyone has any points? Yeah, sorry.

cléments michael/クレメンツ マイケル 29:08

Anything else before we switch over the interface document?

内藤寛之 / NAITO, HIROYUKI 29:13

Ohh no sorry it to sorry Japanese. Ohh no macaroni still kickin estimate today.

Sampathila, Manohara 29:20

Yes, yes, yes, yes, yes, yes, yes, OK that this is what I wanted to discuss. Somehow slip my mind. Yeah.

内藤寛之 / NAITO, HIROYUKI 29:20

Thinking about hi.

Hey.

Thank you.

Yes, yes, send.

Sampathila, Manohara 29:30

OK, so bahana, yeah, that is so.

kawasaki yuujiro/川崎 雄二郎 29:31

And.

Ohh go ahead.

Pant, Bhavana 29:33

Ohh.

Sampathila, Manohara 29:34

The estimation what we had discussed in a day back, yeah.

Pant, Bhavana 29:37

Yes, yes, yes.

Ohh, so basically Kawasaki SAN and Nathan we need 2 users per user group for PQ execution, 7 days, 7 PQ. We need 2 users per user group.

So all the active user groups we have in the system, we will need 2 users per user group.

 **clements michael/クレメンツ マイケル** 30:14

Above, there's no problem if, for example, one user has book in data entry QC.

 **kawasaki yuujiro/川崎 雄二郎** 30:14

It doesn't work.

 **clements michael/クレメンツ マイケル** 30:23

Rolls together.

 **Pant, Bhavana** 30:26

Yeah, yeah, that's not an issue at all. If that is a normal business practice, please feel free to have that user be part of the pqq execution. In fact, it's a good thing.

 **clements michael/クレメンツ マイケル** 30:31

Yes.

Yeah.

 **Pant, Bhavana** 30:38

Because it will save a lot of logging and then logout steps. Although we will have that documented in because we don't know what kind of loser will be there. So we will have log in and logout documented on every you know workflow state change. However if the person is of the same user group, that's an added bonus.

And the only reason we're asking for 2 users, Michael and Kazakhstan is some of these cases, especially PQ one and 2.

We are expecting bigger 12 and the EMA import, we're expecting that it would be processed by the global first and then it will be coming to the Japan team for that reason. And that reason only we're requesting for 2 years 2 users because we don't want to be short on time as such a target is one PQ executed in one entirety, but because some cases will be changing hands.

We think that maybe some BQ might be executed in 2 days because day one, they

might be executed by the global Team Day 2, they might be executed by the local team and for that Reason 2 users per user group.

 **clements michael**/クレメンツ マイケル 31:51
Alright, cause I can send you an assistant.

 **kawasaki yujiro**/川崎 雄二郎 32:07
I can't hear you.

 **clements michael**/クレメンツ マイケル 32:10
So.
We don't have to have individual users per user group. We can, as we discussed internally one one user can be along to multiple user groups.

 **kawasaki yujiro**/川崎 雄二郎 32:18
Yeah.
The.

 **内藤寛之 / NAITO, HIROYUKI** 32:23
Hmm.

 **clements michael**/クレメンツ マイケル 32:24
The script will mention to logout and log in.

 **kawasaki yujiro**/川崎 雄二郎 32:27
Yeah.

 **clements michael**/クレメンツ マイケル 32:28
But the the user can just press, take pass and move on.

 **kawasaki yujiro**/川崎 雄二郎 32:34
Hmm.

 **Pant, Bhavana** 32:35

Ohh password not applicable. Conversely sign and they can move on. We just have one request though. Whosoever does the PQ dry run should be doing the PQ actual execution as well because you know if they have any questions. If they want to understand something new in the 84 system, let that cycle happen during the PQ dry run phase where we still have some time to answer those questions and fix things. If we have a.

 **clements michael/クレメンツ マイケル** 32:35
If I have.

 **Pant, Bhavana** 33:05
A different user doing the PQ dry run and then we have a different user doing the actual PQ execution. That's where we will start having some problems.

 **kawasaki yujiro/川崎 雄二郎** 33:16
You know we have we are planning to assign same size as the driver and actually discussion.
Omar limitation.

 **Pant, Bhavana** 33:24
That would be perfect. Thank you so much, Kawasaki, man.

 **kawasaki yujiro/川崎 雄二郎** 33:28
But not yet decided.
Yeah.

 **Sampathila, Manohara** 33:42
So we will have 7 days for PQ execution connection, so we.
With that, you know we have to keep that in mind to for Peak execution.
Members.

 **kawasaki yujiro/川崎 雄二郎** 33:55
Yeah.

 **clements michael/クレメンツ マイケル** 33:57

And in the in the plan, how much scope have you got for any reruns? I know we shouldn't have them, but they happen.

 **kawasaki yujiro/川崎 雄二郎** 34:06
You.

 **Sampathila, Manohara** 34:08
We should never do as much as possible, but yeah.

 **clements michael/クレメンツ マイケル** 34:11
You.

 **Sampathila, Manohara** 34:12
Ohh.
We have only 2 days for reason.

 **clements michael/クレメンツ マイケル** 34:20
OK. Ohh.
You see issues happen early on in the PQ. Then you know things can be done in parallel and see if they happened towards the end and get problem.

 **Sampathila, Manohara** 34:26
Yeah.

 **clements michael/クレメンツ マイケル** 34:31
OK.
Keep it in mind.

 **Sampathila, Manohara** 34:33
Costs. Yeah, now onwards, I mean.
The timeline is very tight on the scripts we have to conform and move on.
Quickly.

 **clements michael/クレメンツ マイケル** 34:43
Yeah.

Sampathila, Manohara 34:54

OK.

So ohh sorry. Yeah. Any other points by anyone?

kawasaki yuujiro/川崎 雄二郎 35:00

Ohh sorry, I'm signed with regard to the event group.

Cause I'm not concerned we have some ISIS referring bgd.

Pant, Bhavana 35:08

Yes, coming second.

kawasaki yuujiro/川崎 雄二郎 35:19

I share my screen just a moment please.

Pant, Bhavana 35:21

Ohh.

Okay.

kawasaki yuujiro/川崎 雄二郎 35:25

Which you might just joke.

cléments michael/クレメンツ マイケル 35:29

Yes.

Pant, Bhavana 35:33

Ohh this this one is OK because after EGID it's looking at Event Group name in the clause. After that it's looking at even group name. The problem is coming when it's looking at what event group ID equal to. Then like a hard coded number.

kawasaki yuujiro/川崎 雄二郎 35:36

Ohh it's one.

Yeah.

Down with it. So let's see.

Tell you something. Here she goes.

You know some big spine.

Pant, Bhavana 36:02

Ohh.

cléments michael/クレメンツ マイケル 36:05

Good.

kawasaki yuujiro/川崎 雄二郎 36:06

Thank you.

Pant, Bhavana 36:32

I think you're sexy.

kawasaki yuujiro/川崎 雄二郎 36:35

OK, I have time.

Pant, Bhavana 36:35

All right, all over to you.

cléments michael/クレメンツ マイケル 36:44

OK, so let's move on to the interface SSX document and if anyone on the call is not interested in the interface document, feel free to drop from the call.

Thank you.

Pant, Bhavana 36:58

Thank you everyone.

Batheja, Rahul 37:03

I'll share my screen.

Pant, Bhavana left the meeting

 **clements michael/クレメンツ マイケル** 37:17

Yeah, sure. You can see that now.

 **Batheja, Rahul** 37:22

So there were certain comments initially on which we will be updating at the time when when the document is final and the indexing needs to be done again.

Okay.

Ohh morning there were couple of requirement. OK US all that you have also do.

I saw that there were certain things Michael for upgrading this one also.

There are couple of requirements that really wanted to talk about.

 **Ramala, Srinivas** left the meeting

 **clements michael/クレメンツ マイケル** 37:52

Yeah.

 **Batheja, Rahul** 37:58

Then you more than that first.

Okay so one is this in this requirement. OK, so what's happening is that the IT the requirement is asking that drug result should be populated as not reported if the event if the incoming file doesn't contain causality. So I have checked the the.

The incoming file that so it's regarding the issue number 180 basically that you reported earlier. OK, so the.

 **clements michael/クレメンツ マイケル** 38:30

Yeah.

Ohh farm maybe?

 **Batheja, Rahul** 38:35

Sorry, sorry Michael.

 **clements michael/クレメンツ マイケル** 38:37

Before a foreign measures report.

Batheja, Rahul 38:40

Yes.

So in that case, what was happening is that there were only drug result mentioned, drug reaction, relatedness block is not at all present in that.

Okay, I'm more aware like I have checked many of the other cases in production, I prepared a query to check what all was the behaviour in the production environment also and for the similar situation where there is no drug reaction, relatedness block event assessment, that tab has no data at all because.

When does that if, if we have drug reaction lateness, then only it'll be populating data based upon.

Ohh and based upon whatever was the was the input and it will be updating that in the case now if it doesn't have any data it won't be reading any value. In order to manipulate that and update update that event assessment because there is no mapping available between product and event.

So that is the reason that this wasn't getting populated.

So that is the reason, Michael, that this this is not operated at the time when we don't have any data and drug reaction returns block. If you allow me I'll I'll show you the final also.

3 over here there is no such data in the drug law or drug reaction redness. Ideally, if we see any XML file for product and event mapping, we have a drug reaction lateness blog based on that only drug result data is like Argos gets to know where to complete drug, drug relatedness data and based upon the mapping between event and product.

So in this situation we have checked in the production environment that identified various cases. If you want, I can and I can show you that as well.

Ohh, so now that that's the situation over here that August, can't read that block. And if it can't read that block it it doesn't update anything.

And and causality one because there is no such mapping presently exist. So once that mapping exists in the Argus OK then only it shall be able to update it because. It has created a set of joins and created rows in August after importing only.

cléments michael/クレメンツ マイケル 41:30

Okay. So if we look back at the the Word document.

Can we add some notes in here explaining this?

Batheja, Rahul 41:38

Yes, yes, definitely I cannot die.

cléments michael/クレメンツ マイケル 41:42

And the same for the the next one, the 182.

So I think that you're very soon.

Batheja, Rahul 41:46

Yeah. OK.

cléments michael/クレメンツ マイケル 41:48

What is sort of, you know, no due to constraints of the out of the box logic, this only works.

When such and such is present or something, you know you know incoming like that.

Batheja, Rahul 42:00

Sure, my girl.

I I can do that and you know the situation in next next.

Is it if you wanted to do also right?

cléments michael/クレメンツ マイケル 42:09

It's similar.

Batheja, Rahul 42:10

So.

Yeah, it's it's kind of similar. Yeah, it has no date and reaction basically.

Where is that?

cléments michael/クレメンツ マイケル 42:18

They would also doesn't have drug.

Batheja, Rahul 42:21

Yeah.

 **clements michael/クレメンツ マイケル** 42:21

Talk.

Reaction assessment block there either does it.

 **Batheja, Rahul** 42:25

Right. So basically it doesn't have both the situation. First is it doesn't have reaction at all and next is rejection, little man.

 **clements michael/クレメンツ マイケル** 42:26

Ohh.

Yes, if you can mention.

 **Batheja, Rahul** 42:34

So if it doesn't.

Yeah, will mention that.

 **clements michael/クレメンツ マイケル** 42:37

With them, both of those things in the note and put the same note on both the the elements where the comments were.

 **Batheja, Rahul** 42:47

Yeah, yeah. I don't know what, and you can verify it after that.

 **clements michael/クレメンツ マイケル** 42:51

Right.

 **Batheja, Rahul** 42:54

I just have.

 **clements michael/クレメンツ マイケル** 42:56

This one is.

Uh, it's.

Batheja, Rahul 43:03

OK. The other one, regarding the this is.

cléments michael/クレメンツ マイケル 43:07

J9 J, 10.

Batheja, Rahul 43:09

Yeah, Jen and Jen. So Michael, we followed up with Oracle earlier as as we discussed, yeah, they they raised a bug. And also we asked our Cardiff if they can provide any update like any any.

cléments michael/クレメンツ マイケル 43:16

Yeah, I saw that.

Yeah.

Batheja, Rahul 43:27

Ohh timeline or any update on that when this issue this bug will be resolved. Then they said that they they'll follow this process and it will be moved to some different team and then then they'll analyse and further work on it. So we don't have exactly exact time when when this can be verified.

cléments michael/クレメンツ マイケル 43:49

Yeah, at least 2 years.

Ohh, so understood that that's not a problem.

Where instruct going to give some instructions the users who work on their cases and take it from there. But from the validation perspective, what's the next step? Cause I was the code, the requirements are already signed off in the UFOs.

Batheja, Rahul 44:01

Right, nothing.

Yeah.

That's right.

cléments michael/クレメンツ マイケル 44:13

The code is being implemented per the requirement.
That's fine, but what do we do? Where do we describe the
Oracle Bug and the essentially this can't be tested. Do we mention it in the
traceability matrix? Do we mention it as a deviation or in the summary report or?
I don't know. So we need to work out.

Batheja, Rahul 44:37

Ohh.

Sampathila, Manohara 44:39

I think either in I don't know whether some traceability we can detail out so much,
but summer report is one option.

Batheja, Rahul 44:39

Yes.

Sampathila, Manohara 44:49

We can discuss with the Puneeth once where to mention this.

cléments michael/クレメンツ マイケル 44:49

You.

Yeah, cause I mean traceability. Obviously if we know about the issue, we
intentionally don't test it because.

Of the issue then, the traceability needs to mention the gap as to why it's not tested.

Sampathila, Manohara 45:07

Yeah, being excel file, we can add one columns, comments, something of that sort
for that and.

cléments michael/クレメンツ マイケル 45:14

Yeah, I think there's generally a comments comma.

Sampathila, Manohara 45:18

At all we can discuss with the Puneeth on this.

Batheja, Rahul 45:21

Yes. So what else can you do?

cléments michael/クレメンツ マイケル 45:22

Yeah. So for this document.

Batheja, Rahul 45:26

Microsoft, can we do one thing that maybe we can talk to Puneet on this and in Monday we can spare 5 minutes on this part and have a conclusion on this. So that as as is document can be moved forward right.

cléments michael/クレメンツ マイケル 45:41

Yeah, I think I'm fine with the SSX document part here for this. It's just a matter, Harrison said. We need to talk about this with.

Batheja, Rahul 45:44

OK.

OK, OK.

Sure.

Sampathila, Manohara 45:50

So what we can do is Rahul we can just update action item and you know the track it in that. So that either summary report or yeah.

cléments michael/クレメンツ マイケル 45:50

Validation.

Batheja, Rahul 45:57

Fun time, yeah.

cléments michael/クレメンツ マイケル 46:01

OK.

Batheja, Rahul 46:01

Yes, sure.

Sampathila, Manohara 46:02

That way you know the SSX can be taken forward.

cléments michael/クレメンツ マイケル 46:06

Yeah.

Batheja, Rahul 46:06

Chromosome. That's fine. Thank you.

Ohh.

cléments michael/クレメンツ マイケル 46:12

Nothing. The only other one was you need to send me some evidence of the email testing.

Batheja, Rahul 46:16

Yes, yes, my dear. So we'll share that while separate mail KR team is pulling things out and will be sharing it with you shortly.

cléments michael/クレメンツ マイケル 46:23

Because we have.

Cause we haven't received any emails from the debt environment on our side.

Batheja, Rahul 46:32

Ohh, my God. Yeah, yeah, this this has been noted and.

We have circulated this in our entire team and they'll they are providing the results and will send you a consolidated mail on that.

Hegde, Shruthi S joined the meeting

cléments michael/クレメンツ マイケル 46:44

OK, you think that will be done today?

Batheja, Rahul 46:50

Sure. I'll check with him. My dad and radio.

cléments michael/クレメンツ マイケル 46:54

Okay, if not today then drop me an email letting letting us know when it's gonna come.

Batheja, Rahul 46:58

Sure, sure.

And.

This is what we have already talked.

cléments michael/クレメンツ マイケル 47:06

Yeah.

Batheja, Rahul 47:07

Yeah, I saw you close to comments.

cléments michael/クレメンツ マイケル 47:10

Yeah, I'm through.

Batheja, Rahul 47:12

Okay so this is the beginning of document then and thanks Michael for putting the entire list food list mapping and the in that and I'll I'll update the RDB version and all that you mentioned earlier that I'll I'll update that as well so.

cléments michael/クレメンツ マイケル 47:30

Yeah.

And we need to make sure that that the the IQ gets the codeless mapping updates into it.

Batheja, Rahul 47:36

OK.

Yes, yes.

 **clements michael/クレメンツ マイケル** 47:42
Yeah.

 **Batheja, Rahul** 47:43
Sure.

 **clements michael/クレメンツ マイケル** 47:45
Okay.

 **Batheja, Rahul** 47:45
Ohh sorry sorry. Sorry sorry Michael. The last thing that you mentioned IQ gets the code list mapping update.

 **clements michael/クレメンツ マイケル** 47:53
So the the.

 **Batheja, Rahul** 47:54
So we we need to have it in the populated in the system also. So that's what you are mentioning, right? Yeah. OK.

 **clements michael/クレメンツ マイケル** 47:57
Yet.
Yeah.

 **Batheja, Rahul** 48:02
Hi, Michael. Yeah, we'll work on that.
We have, we had it in our list and we'll work on it to update system as per the provided cheats.

 **clements michael/クレメンツ マイケル** 48:12
OK, great.

 **Batheja, Rahul** 48:14
I'll just mention a note over there.

Maybe I'll have it in mind. So, Michael, I guess these were all the moments that we that we provided in interface St 6 document so.

 **clements michael/クレメンツ マイケル** 48:29

Yeah. So wait for you for you to update on those 2 items. We need 181 before we do that. So the 2 items, 180 and 182, you'll update the notes. There was another comment there about the issue 20 and 21.

Batheja, Rahul 48:39

Yeah.

Yeah, yeah, right, right.

clements michael/クレメンツ マイケル 48:48

Gonna start, we sort of cluster. We jumped.

Batheja, Rahul 48:51

Yeah.

clements michael/クレメンツ マイケル 48:52

Here so 2020 and 21 were the, you know, the system wasn't working per the requirement.

They were just code bugs and there was number impact on this document. Is that what you're saying?

Batheja, Rahul 49:07

This issue 20 improvement from the issue log items.

clements michael/クレメンツ マイケル 49:10

Yeah, they were from like the the early the first round of testing we did for siren, the.

Batheja, Rahul 49:12

OK.

I.

Yeah, I'll. I'll open them with you. I have them.

 **clements michael/クレメンツ マイケル** 49:26

You know this was.

And there was this 20, this funny era that also came up in some testing for licensed partner, I think. And then you fixed it and then set 21 is more detailed about.

Um particular data, not mapping.

And then you fixed it and then it worked.

Why don't have any insight into what was fixed on either of these issues? So I don't know if there's any impact.

 **Batheja, Rahul** 50:01

Michael, I'll I'll check this issues and.

And update it in the command like what we actually fixed OK and if needed then I'll update the update. Tested since document OK.

 **clements michael/クレメンツ マイケル** 50:09

OK.

OK.

Good. What must I?

Help your mother, huh? Anything else?

 **Sampathila, Manohara** 50:26

Thanks, Michael. So I think we are almost there. So the next day is the Argos SSX, I hope once.

 **clements michael/クレメンツ マイケル** 50:30

It.

That's tough one.

 **Sampathila, Manohara** 50:40

Yeah, trying to clear one one so that we are good for the validation.

 **clements michael/クレメンツ マイケル** 50:40

Yeah.

Batheja, Rahul 50:45

So sorry, you know I send. Can I? Can I talk?

Sampathila, Manohara 50:50

Shut shut what?

Batheja, Rahul 50:51

Yeah, actually.

Michael I realised like there was a code change in this OK&RS got approved in in first week of April and we we fixed this part. I think earlier only.

So that yeah, that's the reason that it's already captured in this year s document.

cléments michael/クレメンツ マイケル 51:12

Ohh, I said.

Batheja, Rahul 51:20

I'll I'll still confirm like what was the issue and what we fixed, OK.

cléments michael/クレメンツ マイケル 51:25

Okay, thank you.

Batheja, Rahul 51:27

Thank you.

Tell him when I was sending them, but.

Sampathila, Manohara 51:35

No.

Ohh.

So on the.

Actually front Michael.

Other than Taiwan or related?

Things any other pending.

 **clements michael/クレメンツ マイケル** 51:52
Yes.

 **Sampathila, Manohara** 51:54
I believe no, but just wanted to confirm.

 **clements michael/クレメンツ マイケル** 52:02
I also believe no.
Ohh, hang on a second.
What's?
Just looking for a list.

 **Sampathila, Manohara** 52:19
Sure.

 **clements michael/クレメンツ マイケル** 52:28
That's Korea email configuration.
But that's like tied to Taiwan in a in a sense, if we haven't got Taiwan working, we've got no chance of getting career working.
Ohh.
Done.

 **Sampathila, Manohara** 52:54
So just to summarise this Taiwan, we are able to send to them, right?

 **clements michael/クレメンツ マイケル** 52:55
On the.
Yes, sure. I will send emails.
But there was a lot of emails kind the other day, apparently due to some bug and some testing and stuff, so I'm retesting it trying to retest today.

 **Sampathila, Manohara** 53:11
Yes. Yeah.

 **clements michael/クレメンツ マイケル** 53:13

On the inbound email parts, also trying to test today.

 **Sampathila, Manohara** 53:13

So.

OK.

So once you confirm then I hope we can move, you know the if it is, you know the satisfies our requirement then we can.

Set it for scoria.

 **clements michael/クレメンツ マイケル** 53:28

Yeah, yeah, yeah.

And the other thing the.

Connectivity from move it to the in and out folders needs to be worked on I think.

So this will set up the move that thing, but I'm not quite clear.

If that's working all correctly yet, so I puts it quite a few comments on that in the CBD.

 **Sampathila, Manohara** 53:54

Okay.

Ohh what time?

 **clements michael/クレメンツ マイケル** 53:57

But some difference destinations like swissmedic for example.

Instead of using axway it should use move it.

So hopefully you know between the CBD and once we get the appendix for the 80s X with the details in it, then we'll be able to figure that out.

 **Sampathila, Manohara** 54:20

Yeah, but.

Ohh it is what I'm thinking is move it I understand but actually switching.

Ohh.

 **clements michael/クレメンツ マイケル** 54:29
Yeah, yeah, yeah.

 **Sampathila, Manohara** 54:32
Here's what I'm thinking from uh.

 **clements michael/クレメンツ マイケル** 54:34
Sometime next week maybe.

 **Sampathila, Manohara** 54:36
Yeah.
Because we have to raise ticket and then, you know, they get things done. So again there will be some SL.

 **clements michael/クレメンツ マイケル** 54:42
Ohh.
Yeah, OK, well, let's.
Hopefully get this Taiwan stuff done and then we can set the date.

 **Sampathila, Manohara** 54:52
Yeah, because in Calster data center, everything moves on Slas.
Which are in.
Not in our control.

 **clements michael/クレメンツ マイケル** 55:00
Who is this? I'll strip to escalate.

 **Sampathila, Manohara** 55:04
So it is like it. I am escalating everything alternate day to trip.

 **clements michael/クレメンツ マイケル** 55:12
Ohh I'll have a call with him next Tuesday as well. Just quickly.

Sampathila, Manohara 55:15

Sure. Thank you.

cléments michael/クレメンツ マイケル 55:19

OK, no nothing else for now. Back to document reviews.

Sampathila, Manohara 55:20

OK, OK then so you can nothing else, right?

Yeah, thank you. I don't think.

Anything pending for now?

cléments michael/クレメンツ マイケル 55:29

Yeah.

Thanks everyone. Bye.

Sampathila, Manohara 55:31

Thank you. Have a good day. Bye bye.

kawasaki yuujiro/川崎 雄二郎 55:32

OK, bye.

Batheja, Rahul 55:33

You're ready time.

内藤寛之 / NAITO, HIROYUKI 55:35

Thank you.

松橋将太 / MATSUHASHI, SHOTA left the meeting

cléments michael/クレメンツ マイケル left the meeting

kawasaki yuujiro/川崎 雄二郎 left the meeting

👤 阿部敦子 / **ABE, ATSUKO** left the meeting

👤 **Batheja, Rahul** left the meeting

👤 **maeda toshirou**/前田 敏郎 left the meeting

👤 **Sampathila, Manohara** left the meeting

👤 内藤寛之 / **NAITO, HIROYUKI** left the meeting

👤 **Ding, Cho Liangjun** stopped transcription
